

The Beginning....

Founded on principles they live each day...

Grounded with faith in Christ, and motivated with honesty, integrity and a desire to be of service to others...

Larry W. Harris has been involved in the farming industry since he was 10 years old. His enjoyment of working with the land and people led him to jobs with local farmers and farm industry related work over the years. Larry W. Harris saw his dream become a reality in 1986, when he first opened the doors of his new business, Midwest Ag. Systems, Inc. With hard work and dedication, Larry has been the driving force that has made

Midwest Ag Systems, Inc. one of the leading grain handling equipment and service businesses today.

Quality products and service you can count on has been the goal of Midwest Ag. Systems, Inc. since it's beginning. From a pickup truck and a box of tools, farmers have seen many changes and improvements in the company's 19 years of business. Larry's wife, Joyce, joined him in the business taking care of the bookkeeping and office. In 1990, they welcomed their son, Jeffrey, into the family of dedicated employees that continue to be a part of Midwest Ag. today. The principles and desires of the business have never changed. Our continuing commitment comes from a family business environment with hands-on-management style.

Today, you can find Midwest Ag. Systems, Inc. at our

5-acre facility located in Reo, Indiana. Our progressive approach has helped us grow into a leader in the grain and material handling equipment industry. We offer new grain handling and drying equipment, repairs and maintenance in addition to design, fabrication and millwright work. With our work force of dedicated and trained employees, we welcome the opportunity to construct and maintain your grain handling and storage facilities.

Left to right, Jeff, Joyce & Larry Harris

Midwest Ag. Systems, Inc. has grown since 1986 from a pickup truck and a box of tools, into a thriving business with design, fabrication, millwright, repair and maintenance available at their 5-acre facility. Larry and the entire staff are eager to work with each client to make their grain producing facility the safest, most efficient and technologically advanced as possible. Our work force of dedicated and trained crews can construct and maintain your grain handling and conditioning equipment.

As we look at the possibilities ahead and the ever changing grain industry, we have embraced the new technology being developed to better enhance the quality and safety for the producer. Larry and all employees at Midwest Ag Systems, Inc. are dedicated to quality products and service you can count on.
